## COTTON RESEARCH COUNCIL

**PROJECT CODE:** CS35L

**PROJECT TITLE:** Purchase of climatic data recording equipment for Australian Cotton Cultivar Trial sites in NSW.

**STAFF INVOLVED:** Mr PE Reid

### FINAL REPORT

The objective of this project was to install climatic recorders at two sites in NSW where Australian Cotton Cultivar Trials are conducted.

Two climatic recording units were purchased and installed at Boggabilla and Bourke. Using the telephone system and the SIRATAC VAX computer, weather data is collected automatically on a daily basis and analysed in conjunction with our cultivar trial results.
